Renta Fija Internacional (the "Sub-Fund")

a Sub-Fund of Renta 4 (the "Fund")

"I EUR (H)" (LU1475744105) (the "Class")

The Fund has appointed Renta 4 Luxembourg as management company.

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund is designed for investors willing to have a portion of their assets exposed to public and corporate fixed income securities issued and traded worldwide including emerging markets.

At least 50% of its net asset will be invested in fixed income securities with medium credit ratings (between BBB+ and BBB-) or higher. Other fixed income securities may have lower or even no credit rating. The ratings referred to above relate to those assigned by Standard & Poors or equivalent ratings assigned by other recognised rating agencies.

The duration of the portfolio will be adjusted depending on the economic situation or market view, and may be either short- or long-term.

Up to 100% of the Sub-Fund net assets may be invested in securities issued or guaranteed by one single EU Member State or its local authorities, by another OECD Member State, or by public international organisations in which one or more EU Member States are members.

Assets and markets will be selected in order to seek investment opportunities or diversification possibilities without being able to predetermined type of assets or locations.

The Sub-Fund may use derivatives traded on regulated derivative markets for both to optimise portfolio management and to protect its value against adverse movements on the financial markets.

Dealing Frequency

The net asset value for the Class is calculated on each bank business day in Luxembourg based on the pricing of the preceding bank business day ("the Transaction Day"). The cut-off time to submit subscriptions and/or redemptions orders is 2 p.m. Luxembourg time on the Transaction Day.

Income

The Class is cumulative. No dividend will normally be distributed.

Class currency

The minimum subscription amount is EUR 150'000 for the initial subscription and the minimum subsequent subscription amount is EUR 500.

RISK AND REWARD PROFILE

Risk Disclaimer

This current risk profile may not be a reliable indication of the future risk profile of the sub-fund.

The risk category shown is not guaranteed and may shift over time.

The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.

The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The risk category is driven by the focus on fixed income securities, with a bias towards investment-grade securities.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward indicator include:

- Liquidity risks: The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

- Counterparty risks: The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.
- Credit risks: The Sub-Fund may invest a portion of its assets in debt securities, including contingent convertible bonds. The issuers of debt securities may become insolvent, which will mean that the securities will lose all or some of their value. In specific cases of distress, contingent convertible bonds may be turned into equity and absorb first losses.
- Risks from the use of derivatives: The Sub-Fund may use financial derivatives instruments which may result in the sub-fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- Operational risks: The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the Management Company or by external third parties or may be damaged by external events, such as natural disasters.
